

NatCen Ensures Client Data Protection with BCWipe

THE CHALLENGE

The National Centre for Social Research (NatCen) is Britain's largest independent not-for-profit social research organisation. Ensuring data protection for their clients became paramount 10 years ago due to increasing demands for stringent standards. Before laptops could be re-imaged and supplied to other users or assigned to a new client's project, these standards had to be met.

To ensure each device was secure and ready to be used again within the organization, the National Centre for Social Research needed a solution that could:

- Securely wipe hard drives to meet the 7-pass U.S. DoD 5220.22-M (ECE) and FIPS 140-2 standards
- Generate tamper-proof wiping reports for clients
- Provide a user-friendly solution that doesn't require extensive training

THE SEARCH

Driven by client demands and regulatory requirements, NatCen turned to online research to find a suitable solution. They discovered BCWipe Total WipeOut, which is renowned for its reliability and trusted by organizations such as the U.S. Department of Defense.

THE SOLUTION

Impressed by BCWipe Total WipeOut's credentials, NatCen implemented Jetico's solution to meet compliance requirements and assure clients that their data would be securely erased.

"Getting started with BCWipe Total WipeOut was seamless. The instructions provided were precise and easy to follow," explains the IT Asset Coordinator of NatCen, Cheryl Bettis.

PROFILE: National Centre for Social Research (NatCen) is Britain's largest independent not-for-profit social research organisation. For the last 40 years, we've worked on behalf of government and charities to find out what people really think about important social issues and how Britain is run.

INDUSTRY: Non-profit

EMPLOYEES: 400+

WEBSITE: www.natcen.ac.uk

NEED FOR WIPING: Assure client data is securely erased, backed by wiping reports; comply with DoD and FIPS standards.

“Trust is crucial for companies working with us. Ensuring that no sensitive data remains after a project is completed is simply a must.

Cheryl Bettis, IT Asset Coordinator, National Centre for Social Research

“Thanks to BCWipe Total WipeOut, we confidently meet client demands with a robust, compliant and user-friendly data erasure solution.

“We created a bootable disk, plugged it in, and the wiping process started effortlessly.”

With an enterprise license of BCWipe Total WipeOut, NatCen were able to wipe an unlimited number of laptops, ensuring they met the highest security standards before re-imaging and reallocating them.

Beyond the security and ease of use, NatCen valued the responsive customer service provided by Jetico. “We couldn't be happier with the results and the support we've received. The 10-year ongoing relationship is clear proof of our satisfaction,” concludes Cheryl Bettis.

WHY BCWIPE TOTAL WIPEOUT

- Wide choice of wiping schemes – Meets industry standards
- Tamper-proof wiping reports to ensure trust
- User-friendly solution – No need for extensive training
- Reliable provider – Trusted by the U.S. DoD for 15+ years
- Excellent customer service – Enhance overall experience

BCWipe Total WipeOut™

ERASE HARD DRIVES

BCWipe Total WipeOut – Enterprise Edition

Engineered for a wide range of users — from large organizations handling national security to small offices with personal data — BCWipe Total WipeOut keeps sensitive information from falling into the wrong hands.

- Compliant disposal when upgrading hardware
- Wiping before sending off for physical destruction
- Clearing to decommission or repurpose drives between classified programs
- Erasing failed hard drives under warranty before returning to manufacturer
- Donating computers to community

Customers have the option of buying licenses for a defined number of wipes or working with an unlimited annual licensing option. In addition to a bootable disk, BCWipe Total WipeOut can wipe drives and store reports remotely over the network by using nothing more than a web browser.

KNOW YOUR THREATS: END-OF-LIFE vs. ONGOING

By erasing entire hard drives, BCWipe Total WipeOut handles end-of-life wiping. But while computers are in use, you are at risk to ongoing threats — both physical and virtual. Protect your active data...

BCWipe

- *Securely erases selected files and folders — including data remanence, data spills*
- *U.S. DoD-trusted with military-grade wiping schemes*
- *Available for Windows, Mac OS X and UNIX*

BestCrypt

- *Encrypts your sensitive files or all data on whole disks — protection from hackers, cloud, lost hardware*
- *Peace of mind for compliance (GDPR, HIPAA, PCI DSS)*
- *Available for Windows, Mac OS X, Linux and Android*
