

# Protecting Data, Powering Hope

Data Erasure Certificates That Enable Secure Donations

## THE CHALLENGE

**Hardware for Hope** is a young charity working to bridge the digital divide by refurbishing used computers and giving them a new lease of life in the hands of students, seniors and others in need.

Before reusing any device, donating organizations required proof of complete data erasure. Without it, valuable equipment transfers were delayed or blocked.

“There are many organizations interested in donating large batches of computers, but only if we can provide the certificates of erasure,” explains Joseph Slevin, founder of Hardware for Hope.

To satisfy these compliance requirements, Hardware for Hope required a solution that could:

- Deliver tamper-proof **Certificates of Data Destruction**
- Meet **NIST 800-88** and **IEEE 2883** standards
- Provide clear, consistent reports for easy review and auditing

## THE SEARCH

While exploring wiping solutions, Hardware for Hope discovered BCWipe Total WipeOut through a mix of Google and AI-assisted research. After testing several tools and reviewing vendor documentation, Jetico’s solution best met their compliance needs.

## THE SOLUTION

**BCWipe Total WipeOut** stood out for its intuitive setup, automated wiping process and trusted reputation for certified, compliant data erasure.

“Straightforward, reliable and built for compliance – that’s BCWipe Total WipeOut.

“The tamper-proof certificates and easy-to-read reports from Jetico’s software make it effortless to earn the trust of our donors.

**Joseph Slevin, Founder, Hardware for Hope**

With Jetico’s solution, Hardware for Hope can securely erase all data while meeting the highest compliance standards, including NIST 800-88 and IEEE 2883.

The software also delivers clear, tamper-proof Certificates of Destruction that are easy to review and share, assuring contributing organizations that every device is properly sanitized before reuse.

“Thanks to Jetico, we can give our donors complete confidence that every device is securely wiped and certified, helping us make technology accessible to everyone,” concludes Joseph Slevin.

**PROFILE:** Hardware for Hope is a nonprofit organization dedicated to reducing e-waste and promoting digital inclusion. By securely wiping and donating computers, the charity provides access to technology while empowering communities through education and sustainable practices.

**INDUSTRY:** Non-profit

**EMPLOYEES:** 3

**WEBSITE:** [hardwareforhope.com](http://hardwareforhope.com)

**NEED FOR WIPING:** Certify complete data erasure with tamper-proof reports and compliance with NIST 800-88 and IEEE 2883 standards.

## WHY BCWIPE TOTAL WIPEOUT

- Tamper-proof Certificates of Destruction to build donor trust
- Compliance with NIST 800-88 and IEEE 2883 standards
- Easy-to-read reports
- Intuitive setup and automated wiping process
- Trusted reputation for reliable, compliance-focused solutions

# BCWipe Total WipeOut™

Wipe Hard Drives, SSDs (NVMe), SSHDs & Macs to Leave No Trace Behind

## ERASE HARD DRIVES

### BCWipe Total WipeOut – Enterprise

Engineered for a wide range of users—from large organizations handling national security to small offices with personal data—BCWipe Total WipeOut keeps sensitive information from falling into the wrong hands. The software can be used for:

- Compliant disposal when upgrading hardware
- Wiping before sending off for physical destruction
- Clearing to decommission or repurpose drives between classified programs
- Erasing failed hard drives under warranty before returning to manufacturer
- Donating computers to community

Customers have the option of buying licenses for a defined number of wipes or working with an unlimited annual licensing option. In addition to a bootable disk, BCWipe Total WipeOut can wipe drives and store reports remotely over the network by using nothing more than a web browser.

## KNOW YOUR THREATS: END-OF-LIFE vs. ONGOING

By erasing entire hard drives, BCWipe Total WipeOut handles end-of-life wiping. But while computers are in use, you are vulnerable to ongoing threats—both physical and virtual. Protect your active data...

### BCWipe

- *Securely erases selected files and folders — including data remanence, data spills*
- *U.S. DoD-trusted with military-grade wiping schemes*
- *Available for Windows, Mac OS X and UNIX*

### BestCrypt

- *Encrypts your sensitive files or all data on whole disks — protection from hackers, cloud, lost hardware*
- *Peace of mind for compliance (GDPR, HIPAA, PCI DSS)*
- *Available for Windows, Mac OS X, Linux and Android*
